

IDEC CORPORATION

Installations of IDEC Intrinsically Safe System Type EB3L-N Lamp Barrier

Draw. No. B-1341-4Rev.B Apr. 26, 2013

AIS / I,II,III, / 1 / A,B,C,D,E,F,G / $Ta = 60^{\circ}C$ $[I/0] / AEx [ia] / IIC / Ta = 60^{\circ}C$

When installing an IDEC Lamp Barrier, make sure it conforms to the following drawings and descriptions as well as all applicable requirements. The Lamp Barrier must have "EB3L-N" in the part number.

The Lamp Barrier must be located in a safe area (unclassified location).

Intrinsically safe apparatuses such as the Pilot Light (LED)etc. approved or considered to be "simple apparatuses" may be located in a hazardous (classified) area.

Substitution of components may impair intrinsic safety Warning!

"EB3L-...N"= Series type Certified Barrier: Type EB3L-abcdeN

01, 02, 03, 05, 06, 08, 08C, 10, 16C(C: common wiring only) A: 100~240Vac, **D**: 24Vdc e = connection Blank: Termin S: for Supper LED K: Sink, S: Source a = Outputb = channels

c = Signal typed = Power supplyBlank: Terminal, -C: Connector

·Rating and Parameters of I.S

UNCLASSIFIELD LOCATION

Channel common wiring (Common max. 16 between any Pn(+) terminals and any Nn(-) terminal) Note: To set up common wiring, connect two "N" terminals between adjoining Lamp Barriers in parallel. HAZARDOUS (CLASSIFIED) LOCATION Class I, II and III, Division 1, Groups A, B, C, D, E, F and G

UNCLASSIFIELD LOCATION

Notes

- Use intrinsically safe equipment that is FM Approved or simple apparatus (a device which will neither generate nor store more than 1.5V, 0.1A, 25mW such as switches, thermocouples, LED's and RTD's).
- Install the EB3L-N Lamp barrier in compliance with the enclosure, mounting, spacing, and segregation requirements of the ultimate application.
- Make sure that the control equipment connected to the EB3L-N Lamp barrier does not use or generate more than 250 Vrms or 250Vdc (Um = 250V).
- Install the EB3L-N Lamp barrier in accordance with ANSI/ISA RP12.06.01 "Installation of Intrinsically Safe Systems for Hazardous (Classified) Locations" and National Electrical Code (ANSI/NFPA 70).
- Make sure that all bolts, nuts, screws, and other means of fastening, including the unused wiring screws, are fastened in place, properly tightened and secured. Mount the EB3L-N on a 35mm track or directly on a panel surface using screws.
- Make the layout and wiring so as to prevent the electromagnetic or electrostatic inductions to the intrinsically safe circuit. For example, separate the intrinsically safe circuit from the non-intrinsically safe circuit by a minimum space of 50 mm or using a full height metal separator. If color-coding is required for the intrinsic safe components and terminals, use only cables and terminals with light blue markings.

^{*} No revision to this drawing without prior FM approval.
